

Puck

The Puck series achieves style through simplicity. A lamp that can easily become a firm favourite thanks to its light source, versatility and discreet design. A series that brings a sense of warmth to spaces despite the strict elegance of its form. A classic that is truly timeless.

It was in 1987 that the lighting designer Åke Hultgren created the Puck family. Each of the different models in this timeless series blends effortlessly into the setting in which it is used.
